## Beauty and elegance

### **As the saying goes “Home is where the heart is.”**

We specialise in making homes like yours more secure and more beautiful. We achieve this by using expert installers to fit British-made PVC-U windows and doors of an exceptional standard. Our track record proves that to replace really can be to upgrade. Our products put the elegance into energy efficiency, the style into security and a lifetime of enjoyment into high performance.

So whether you're looking for more of a wow factor, more security or to add more value to your home, we'll help you achieve your aims. Because the products we install are high quality, well tested and well trusted by home-owners across the UK.

*Take a look to find out how we can add even more heart to your home.*

“Homes are currently responsible for around 28% of UK CO<sub>2</sub> emissions, contributing to the impact of climate change.”

**The Glass and Glazing Federation**

# Energy efficiency

## Exceptional performance that's good news for the planet - and for your pocket.

Turn your home into a lean green energy-saving machine, by installing our PVC-U windows and doors. We can help you to reduce your carbon footprint and your energy bills in lots of clever ways.

### Top environmental credentials

Our products come top of the class when it comes to environmental credentials. They have been awarded an energy rating of up to A+ and are made of a material that's achieved a BFRC (British Fenestration Rating Council) Green Guide A rating.

But there's even more. Our products are designed to provide excellent U-value ratings for their efficiency at keeping the heat in your home - and the very best levels of Window Energy Rating (WER).

### Planet-friendly features

Our products are packed full of clever features like plastic thermal reinforcements made from 100% recycled material to keep in more heat, to advanced glass that can reflect heat back into your home and capture free heat from the sun through solar gain. Most importantly, our products are also designed so that they can be collected and recycled back into new PVC-U products.

### Renew and recycle

Rising energy costs, cold homes, global warming, we're helping to address these important issues. Our windows cleverly include some non-visible recycled PVC-U window content, such as the reinforcement bars that are fitted inside the opening frame profiles to provide added strength and thermal efficiency. Unlike some other options out there, our PVC-U windows can be recycled up to 10 times with a total lifespan of 400 years!

## Security

**You can't put a price on security.**

**You could count the cost of not choosing the most secure replacement windows and doors.**

Not every replacement window system comes with the BS 7950 standard to demonstrate a superior security performance. Not all replacement doors come with PAS 24 accreditation for enhancing the security of your home. Not every replacement door comes with an optional upgrade to Police approved "Secured by Design" locking technology. Ours do.

*We aim to make secure mean more.*

# Quality

**Making a change to your home? No doubt you are seeking the highest standard of quality for your new PVC-U windows and doors.**

So are the experts. Our windows have achieved accreditation from the British Board of Agrément, the organisation that decides which building products are fit for purpose.

28mm thick insulated double glazed units are fitted as standard for thermal efficiency\*.

Glazing beads are fitted internally for extra security.

Opening frames are fully weather-stripped and reinforced with 100% recycled PVC-U bars for added strength and increased thermal performance.

Outer frames measure 70mm front-to-back for easy replacement, and profile are multi-chambered to prevent heat loss.

By selecting windows and doors manufactured from PVC-U rather than other alternative framing materials, you can be confident that these products will never flake, peel, rust or rot and they will provide beautiful good looks and maintenance freedom for many years to come.

\*36mm triple glazed option is also available.

## Front and back doors

### Replace for added peace of mind.

Doors give the very first (and last) impression of your home to visitors. They stand between you and the elements. Do your existing doors really stand up to the nonstop demands of everyday life?

### Protect your family

Do your doors help to protect you and your family? Our doors do exactly that, whether you are in or out. Made of long lasting and durable PVC-U and with proven high performance for security and safety, they'll stand up to the challenges of your busy everyday life. For even more peace of mind, you can add Police approved "Secured by Design" locking hardware.

### Make a great first - and last impression

How do you create a lasting impression? With PVC-U doors that are as visually striking as they are strong. Upgrade your home with front and back doors that offer a choice of door panels and designs. This positive impression is lasting in other ways, too - many, many years with virtually no maintenance because, being PVC-U, your replacement doors won't rot or fall apart, however hard you make them work.

## French doors

**Open out your space in classic style.**

You'll find our PVC-U French doors bring added flavour to family life. French doors feature two leaves hinged on either side that typically open outwards to leave a clear opening. You can make access even easier by adding one of our low threshold options.

The enjoyment doesn't stop there. Fine dining with added elegance, great summer parties with easy access to the garden, added natural light. Your new French doors give you all this and more. What colour of door frame and hardware options you choose is up to you.

While you get on with living your life, your French doors will keep you safe and secure, with their high quality key-operated locking mechanisms.

The only instructions you'll ever need with our French doors are:  
"Install. Relax. Enjoy!"

*The low maintenance benefits and long life of PVC-U gives you even more time to relish your added space.*

## Colour options

**To create added impact with your replacement windows and doors, just add a splash of colour!**

### Woodgrains

In addition to White, we offer three woodgrain shades with our windows and doors - elegant Mahogany, warm Golden Oak and gorgeous Cherrywood.

Expressing yourself with these colours isn't limited to just one selection. For example you can specify White on the inside and your woodgrain colour of choice on the outside. So your PVC-U windows and doors will look great from every angle.

All of our colour options deliver the practical advantages of PVC-U windows - energy efficiency, security and low maintenance.

Cherrywood

Golden Oak

Mahogany

### Artisan woodgrain collection

Want to live life in full colour? Now you can do exactly that, with a bigger choice of colours for your replacement windows and doors.

13 eye-catching Artisan shades are available, gorgeous, striking colours like Green, Grey and Cream, or our sumptuous selection of woodgrains such as Rustic Cherry, Irish Oak, AnTeak and Antique Oak. You decide. Our woodgrain finishes are so fine that it's almost impossible to distinguish them from the real thing!

Specify dual colour if you want to enjoy the brightness of white on the inside frame faces and a striking colour finish on the outside. Alternatively for added impact, bring the colour indoors by opting for your chosen colour on both sides.

Our Artisan range really lets you make a design statement. Coupled with all the long-lasting quality and exceptional security of PVC-U windows and doors, it's proof that quality and beauty belong together.
