

Order reference number:

Bays are to be measured using internal dimensions. You will need to measure from the inside corner of the existing window and include any existing bay poles or bay corner angles into these measurements.

Please measure and enter the **internal** dimensions and angles below:

**Widths & Angles** - Once you have determined the internal width measurements, enter these dimensions into the provided boxes. Note you are measuring from the corner of the existing frame to the centre of where the frames join together. I.e between the existing bay poles or bay corner angles.

Please draw with a pen any openers and horizontal or vertical bars needed: (viewed from the outside)

Please indicate any toughened glass requirements with a "T" on the diagram above. Supplied with load bearing supports.

**Height** - Enter the overall height including the existing sill, unless this is not going to be replaced. I.e. a tiled sill is already in place and you plan to leave this in situ.

**Processing** - Once you have entered the required dimensions into the form above and completed the various details below, please save the form and email it to us at [sales@justvaluedoors.co.uk](mailto:sales@justvaluedoors.co.uk). We will then send you a confirmation for you to check over and sign off to proceed.
