

Slimline French Doors

Complete Aluminium
Window System

Slimline French Doors

We offer a range of high-security, robust doors to complement our window range, Anything from a functional rear door, French doors to open up a patio or balcony area, to a range of bespoke entrance doors complete with a choice of designer stainless steel handles and feature panels. The choices and colours are practically endless.

Our ranges of doors suitable for the architectural, commercial, public, new build and retail markets. The doors available are commercial hinged, commercial swing, patio, tilt and slide, slide folding, multi-track slide and automatic. Doors are designed for use as open out or open in, single or double doors, internally or externally beaded with sidelight options for domestic and/or commercial applications.

47mm or 70mm System Available:

- New adjustable hinges and lock keeps
- Single & double doors use multi-point locking mechanisms
- Double doors feature dual lock mechanisms enabling handles on both sashes
- Door sections & hinges are designed with added strength delivering robust performance Internally
- beaded for open in and open out doors Profiles are
- contemporarily styled with a modern, square-edge design
- Low thresholds comply with Document M building legislation
- Z/T sash sections allow for greater coverage and weather resistance

Feature rich, modern doors & windows

Available with threshold and cill options too, allowing you to seamlessly blend inside and out. Choose from a rebated (weathered) threshold or low thresholder and cills. Bifolds run smoothly inside tracks.

Stainless steel or matching coloured hardware like handles and hinges available. There is optional keyed locking on slave handle(s) to further secure and multi-point locking systems for ultimate security on bifolds.

We are able to powder coat to any RAL colour in both single and dual colour, and can supply a matte finish. A marine grade powder coat is also available if required.

Integrated blinds can be installed within our sealed glass units and are available in a range of colours to complement your windows, doors and decoration.

Integrated blind systems

Blinds are operated by a cleverly-designed magnetic slider, placed on the right or left-hand edge of the glass. A narrow adhesive transparent profile ensures the linear movement of the slider. The blind is raised and lowered by moving the slider up or down and is tilted by slightly lifting or lowering the same slider.

The strength to weight ratio of aluminium allows us to construct frames with slim profiles that look neat and tidy in appearance but allow a lot of natural light into your property. We can also create larger frames in aluminium to reduce sightlines and help you make the most of your home.

Our doors are manufactured from slim thermally broken aluminium profiles which provide strength and security, allowing you to fold and slide the panels back to left or right and open up an unobstructed wide opening to a patio or garden.

Folding doors can be specified with a rebated or low threshold so that two floor levels can remain constant.

Disclaimer: From time to time, dimensions, hardware and designs of our products will change to reflect product development. Accordingly, photographs, drawings, and product dimensions may not always be accurately represented on our website or in brochure material. In addition material colours on our website and brochures are representations only. Printing and computers only show an approximation. Customers should choose colours from actual samples. Before purchasing any product you should check with your us as to the current design, dimension and exact colour of any product.
